

CSI JEWETT

# Sterile Processing Solutions

Processing Sinks

## Ensuring the right equipment for your sterile processing department

CSI Jewett manufactures a wide variety of stainless steel decontamination and processing sinks for pre-treatment and manual cleaning of instruments, scopes and miscellaneous equipment. Processing sinks are available with single, double, triple or more bowls depending on model. Constructed of welded, sanitary type 304 stainless steel with large radius inside corners for easy cleanup. Manufactured without crevices, lapped edges, rivets, bolts or other fastening devices, the table work surfaces remain smooth while preventing accumulation of bacteria. Height adjustment is available for improved ergonomics, a key consideration for SPD design in healthcare facilities. CSI Jewett offers a variety of optional features to fit your facility's requirements.

### Spire at your side

### Features

- Recessed drainage work areas
- Hot/cold spray hose
- Lever handle drains
- 2 - 3 (or more) bowls depending on model
- 4 inch back splash
