

March 19, 2020

In these unprecedented times, Spire Integrated Solutions is working to ensure that you have the equipment and services you need. We are committed to the health and safety of our employees, customers and partners and are monitoring the information coming out of the CDC and WHO closely.

We want you to know we are open and here for you. We are still working; we are still manufacturing and shipping equipment and parts. In certain cases, we have increased the manufacturing capacity available to support key applications in healthcare and laboratories as well as infectious waste management. We want to assure you that we can get equipment where it is needed during this challenging period.

Our supply chain has always been and will remain North American based, to that end we have not seen any disruption in materials or parts shipments to date. Manufacturing has continued, and remains ready to serve and help our nation, and truly our neighbors.

We are also here to help bring equipment back into service. Our technicians are available nationwide and we have the parts in stock to recondition or upgrade equipment as urgency and need increases.

Providing infection control and containment solutions has been our primary business for over 30 years and we stand ready to continue to help today.

Most importantly we want to thank those of you working on the front lines taking care of the sick and keeping us all safe. We pray you stay safe and healthy in the coming weeks and months.

As always, Spire is At Your Side

Thank you,

Spire Integrated Solutions
