

Modular Barrier Walls

Scientek custom manufactures and installs any type of stainless steel modular barrier wall to suit your specifications.

They can be used to either close out a service area behind a single sided piece of equipment or to create a physical barrier between pass-through equipment such as a bulk autoclave. The modular wall can be customized with various options such as louvered vents, service doors, windows, ceiling panels or drip panels for bulkheads.

Walls are constructed from type 304 stainless steel, all heli-arc welded and ground to a number 4 polished finish.

Optional Accessories:

- ◆ Single panel
- ◆ Double panel
- ◆ Insulation
- ◆ Service access doors
- ◆ Removable access panels
- ◆ Viewing windows

Our factory, located on the south side of Vancouver (Delta, BC) began as Terminal Sheet Metal in 1913 and earned a strong reputation for building high quality custom metal fixtures for many types of industries. Scientek offers products for a wide range of applications and industries and all are fabricated using the finest materials and craftsmanship.
