VENTILATED NECROPSY TABLES

NECROPSY TABLES

Research Technicians, Medical Professionals and Safety Officers have all become more aware of the harmful effects of chemicals such as formalin, alcohol and xylene in a variety of settings - especially in pathology, necropsy, histology and reproductive toxicology laboratories. In today's climate of stricter regulatory standards, users are more committed to limiting their exposure to potential health hazards.

Scientek offers a complete line of standard and custom designed Down Draft and Back Draft Necropsy Tables and Stations to meet every application. They are manufactured by highly skilled craftsmen using the

SNTP Series

finest material and components. Each model is thoughtfully designed to offer a perfect combination of form and function. Our attention to detail is reflected by the incorporation of the latest innovations in ergonomics from the "Height Adjustment" feature to suite each individual user, to locating accessories such as sinks, faucets, spray hoses, eye wash unit, gas and air cocks, electrical outlets, computer & data ports, controls and switches within easy and comfortable reach of the user.

Each Scientek model features our uniquely engineered air extraction system that has earned Scientek the reputation of being a leader in this field. Total and perfectly balanced air flow covers the entire work surface of each unit, providing an uncompromising level of safety that meets all the AAALAC, OSHA, and ASHRAE standards.

The SNTP and SNTH series of Down Draft Necropsy Tables are constructed of heavy gauge T-316 #4 stainless steel for maximum durability and sanitation. Each unit is heliarc welded and ground to a seamless polished finish. Large radius corners in the sink and drain basin prevent buildup of bacteria and debris. Perforated grids on the work surface allows for drainage of fluid and movement of the ventilated air without disturbing users performing delicate task. The precision engineered air baffling system c/w adjustable air flow control ensures adequate and balanced air flow over the entire work surface while limiting air noise. Air exhaust connection to the building exhaust system can be specified to suit building requirement (vertical or horizontal,

round or rectangular connection). The sink, perforated grids and air baffles are all removable for ease of cleaning. All plumbing fixtures are institutional grade and are

heavy duty chrome plated brass. All electrical outlets are GFI protected. The SNTH series Adjustable Height Down Draft Necropsy Table can be specified with either manually or electrically operated height adjustment.

STANDARD FEATURES:

- ° Large removable sink
- ° Hot & Cold gooseneck faucet c/w swing spout
- ° Pre-plumbed vacuum breakers
- ° Hose spray with 6' long coiled hose & nozzle
- ° Duplex electric outlet
- ° Table rinse system with control
- ° Air volume control
- ° Dual table pedestals
- ° Factory plumbed and wired for single point site connection
- ° Manual or Automatic Height Adjustment (for the SNTH series)

OTHER AVAILABLE FEATURES:

- ° Factory installed heavy duty waste disposer c/w control, solenoid, vacuum breaker and drain
- ° Eye wash c/w hose and spray
- ° Additional hose spray
- ° Additional faucet
- ° Additional sink
- ° Thermoplastic cutting board
- ° Work surface divider
- ° Gas & Air cock
- ° Additional electric outlet
- ° Computer & Data ports
- ° Built-in air filters

SNTH Series

The Model SBS and SBT Back Draft Necropsy Stations are constructed of heavy gauge T-316 #4 stainless steel fully welded and ground to a polished finish. Air flow is directed away from the user toward the back of the station. These stations feature ergonomically designed work surface, large sinks, hot & cold faucets, rinse systems, hose sprays and nozzles, electrical outlets, air volume control and fluorescent lighting. The SBS series comes with a fully enclosed cabinet base. For added protection, the SBS series also offers a flip down glass sash.

SBS SERIES

SBT SERIES

All standard and optional features are similar to the SNTP and SNTH series Down Draft Necropsy Tables.

Additionally, the following options are available:

- Built-in formalin mixing and dispensing system
- Dictation equipment
- Recirculation air exhaust system (eliminate the need to connect to building exhaust)
- Paper towel holder
- Magnetic instrument holder
- Electronic weight scale

SNT SERIES

Custom Island-style Necropsy Work Station

Featuring:

Back Draft Ventilation System

Built-in sinks

Hose spray & nozzles

Thermoplastic cutting boards

Upper Computer shelves

Electrical outlets

Storage drawers

Table rinsing system

Gas & air cocks

Eye wash spray

Hot & Cold faucets

Upper storage shelving

Pull-out computer keyboard drawers

Cabinet base

Whether you are planning new quarters, modernizing present laboratory facilities, adding or replacing equipment, Scientek's sales/design/engineering department can provide expert design services. We will also custom design and manufacture to suit your exact needs.

Scientek will analyze your requirements with you and/or your architect and will send you plans of the complete layout, including equipment specifications.

Scientek's laboratory planning services can save you time and costly mistakes. Your new construction or renovation will not only be right for your current needs, it will also allow for future growth.
